Visualize students testing GPS receivers in preparation for an upcoming field investigation with scientists for ground truth validation of Earth Observing Satellite data along the Rio Grande River.

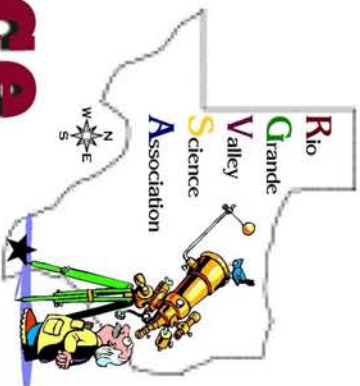

These could be your students after the completion of this hands-on workshop for high school and middle school teachers.

The teachers will

- Learn about the
 - ★ Earth's formation and evolution,
 - ★ Earth-Moon connection,
 - ★ Composition and evolution of the Earth's and its atmosphere,
 - ★ Global climate change,
 - ★ Water circulation and major weather events like El Nino and hurricanes,
 - ★ Remote-sensing techniques.
- Participate in a field trip lead by UTPA scientists to the Rio Grande Delta
- Receive \$600 worth of equipment for their classrooms.
